

ANNUAL ACKNOWLEDGEMENT AND INDEMNITY

I, _____, a duly authorized representative of the company (see below), and of the soil material, am permitted to deposit soil material at Greely Sand and Gravel Inc.'s (GS&G) site located at 1970 Old Prescott Road (Greely) and I am in agreement with the following conditions imposed upon my company by GS&G.

I certify and acknowledge that all soil being imported comes from residential land use, and that I am not aware of any contamination in the soil that I deposit at GS&G. To the best of my knowledge, the soil material meets the applicable site condition standards. Further, I certify that I am not aware of any reason why the soil would cause an adverse effect on the natural environment or human health. Should I become aware of any such contamination or adverse effects, I will cease depositing material at GS&G's site, and I will notify GS&G immediately.

Should I become aware of contamination or adverse effects after I have deposited excess soil, I acknowledge that I am responsible for notifying GS&G, and coordinating and paying for the appropriate removal and disposal of the material.

For each job, I will provide the details as to the source location of soil being transported onto GS&G property by filling out the Excess Soil Importation Form and providing this to GS&G personnel prior to depositing excess soil.

I acknowledge that I am responsible for depositing the soil on the property in a manner and location as directed by GS&G.

I understand and acknowledge that the failure to properly describe the soil could result in the need for GS&G to incur expenses (e.g. administrative, professional, legal regulatory penalties, fines, order) in order to properly dispose of the soil and to comply with the applicable legislation. I agree to indemnify GS&G for all costs that arise from the misrepresentation of the soil. If/when requested by GS&G, the external company will sign and/or deliver any further document(s), and do/perform/provide any further acts and/or assurances as may be reasonably required from time to time pursuant to all the foregoing.

If the excavated material from the same jobsite exceeds 785 cubic yards (600 cubic meters), I will complete the required testing as set out in Ontario Regulation 406/19 and provide GS&G with the results.
